

AOG LISTING

Spectralux Corporation (SLC) is committed to a quick response to you, our customer, when you have a critical/AOG need.

Contact us at 425.285.3000, '0'. You will be put in contact with someone right away.

BRIEF HISTORY

Spectralux Corporation is widely recognized by our customers as the most dependable manufacturer of proprietary components and modules for commercial and military aircraft. We maintain a quality yield above 99.0 percent and an on-time delivery rate above 99.8 percent. You can rest easy knowing that Spectralux will meet your demands in a timely, responsive, and flexible manner.

For over 30 years, we have supplied major aircraft manufacturers and systems suppliers with lighted panels (light plates and keyboards). We continue to provide these components to new and established customers.

Spectralux Corporation regularly publishes Component Maintenance Manuals (CMM) and Service Bulletins (SB). Our Index of Publications is available as a downloadable PDF. Please visit our web site.

What are your repair prices?

Repair prices are based on time and materials

Can you give me a repair estimate?

Repair estimates are provided after we have evaluated the unit for damages to avoid mis-understandings. Our current evaluation charge is \$200.00 for most products. This charge applies with or without repairs. The evaluation charge is amortized into the repair costs.

What is your turn time?

Our average turn time is 10 to 15 working days after receipt of order. Component availability may effect this time.

What is your warranty?

Repair warranty is 6 months from ship date on the repair work performed. Standard warranty exceptions will apply.

What about AOG's?

We can accommodate AOG's.

What do you charge for re-certification?

Recertifications are based on the complexity of the product with a minimum charge of \$250.00.

Do you do credit card transactions?

No. We can process an order as cash in advance or COD if a 30 day terms open credit account does not exist.

Can I just send you this unit and have you evaluate it?

If an account is not set up for your company, we will require you to set an account up before we can receive your product.

Do I need an RMA number to send you product for repairs?

Yes, simply call or email us and we will supply a number.

What certifications can you provide?

Teardown report, return to service 8130-3 certification & EASA

Do you only repair your product?

No, we can repair other product as long as it falls within our repair capabilities and certifications. We will require repair manuals, and or specifications and drawings.

Can you send me a copy of your certifications and repair capabilities?

Yes, a request can be emailed to repairs@spectralux.com.

Do you have an Exchange program?

We are open to working with you on setting up an exchange program.

What are your Classifications?

FAR-145 (License #VLXR781L) for Class 2 and 3 Accessories and Limited Mechanical

What are Class 2 and 3 accessory ratings?

Class 2: An electrical accessory that depends on electrical energy for its operations, and a generator, including starters, voltage regulators, electric motors, electrically driven fuel pumps magnetos, or similar electrical accessories. Class 3: An electrical accessory that depends on the use of an electron tube transistor, or similar device, including supercharger, temperature, air conditioning controls, or similar electronic controls.

What does Spectralux need from my company?

If your part is a new number for us, CMM, drawings and test equipment (if needed)

Are you capable of expanding your repair capabilities?

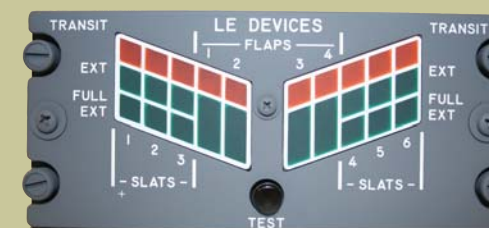

Yes, Spectralux is a manufacturing and fully certified Repair Station

Can you modify/reverse engineer our product?

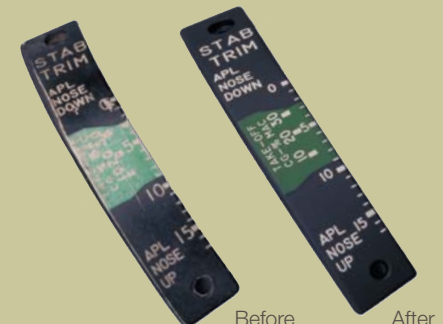

Yes. Full engineering staff to recertify customer approved Spectralux drawing
