Icelandair chooses Dlink+ for their Boeing 757 Fleet

*Spectralux Avionics Dlink+ **all-in-one** ACARS system has been chosen by Icelandair for its Boeing 757 Fleet.*

Redmond, WA – Spectralux Corporation announced today that Icelandair has chosen its Dlink+ ACARS system for their Boeing 757 Fleet.

“We based our choice of the Dlink+ system on its ability to provide us with immediate operational benefits and to meet the future EUROCONTROL Link 2000+ mandate” said Arnor Thorhallsson, Manager of Engineering at Icelandair.

“We are excited Icelandair has chosen Dlink+ and are proud to partner with them in providing operational solutions today and in the future” said Michael Burke, President of Spectralux Corporation.

About Dlink+

Dlink+ provides an all-in-one communication management system with baseline ACARS, Aircraft Operational Control (AOC), VDL Mode 0/A/2 radio, intuitive pilot interface, Out/Off/On/In (OOOI), with customizable menus and frequency tables. Dlink+ offers growth to ATN/CPDLC in order to meet the forthcoming EUROCONTROL Link 2000+ mandate.

Dlink+ has multiple interfaces with systems such as Satellite Communication systems (Iridium / Inmarsat), cockpit printers (ARINC 740/744), ARINC-619-compatible cockpit devices, and Flight Management Systems (FMS).

About Spectralux

Founded in 1973, Spectralux Corporation is one of the most dependable manufacturers of avionics in the aerospace/defense industry. The company's industry-leading record of on-time delivery, quality, and support provides customers with the products and services they need, when they need them.
