Dlink+ w/CPDLC Awarded EASA STC on Icelandair Boeing 757

*Spectralux Avionic's Dlink+ w/CPDLC **all-in-one** data communications system has been awarded EASA STC on the Boeing 757.*

Redmond, WA – Spectralux Avionics and Icelandair jointly announced today that the Dlink+ w/CPDLC system received EASA STC certification on an Icelandair Boeing 757. Icelandair performed all of the design engineering and system installation work and applied for the EASA STC.

According to Michael Burke, Spectralux president, "The Dlink+ w/CPDLC was developed as a cost-effective solution for the EUROCONTROL Link 2000+ data communications mandate in European airspace. We are proud to say Icelandair is a Dlink+ w/CPDLC customer and a very capable engineering design, installation and certification provider."

Bragi Baldursson, Icelandair Head of Design said “Icelandair has been a Spectralux Dlink+ user since 2009. Icelandair has been pleased with the flexibility and performance of the Dlink+ unit and is now excited to meet the Link 2000+ mandate in Europe with the new Spectralux Dlink+ w/CPDLC. We are doing these retrofits at a fraction of the OEM cost with the same operational benefits and regulatory approval.”

About Dlink+ w/CPDLC

The Dlink+ w/CPDLC system provides flight crews with the capability to send and receive both Controller Pilot Data Link Communication (CPDLC) and Aircraft Communication Addressing and Reporting System (ACARS) messages over Very High Frequency Data Link (VDL) Mode A/2 networks. Dlink+ w/CPDLC merges three separate avionics units CDU, CMU, and VDL Mode A/2 Radio into one cockpit-mounted Line Replaceable Unit (LRU). Dlink+ w/CPDLC has multiple interfaces with systems such as satellite communications (Iridium/Inmarsat), cockpit printers and other compatible devices.

About Spectralux Avionics

Founded in 1973, Spectralux Avionics is one of the most dependable manufacturers of avionics and aviation products in the aerospace industry. The company’s industry-leading record of on-time delivery, quality and support provides the customer with the products and services they need, when they need them. About Icelandair

Icelandair is a leading airline offering flights to and from Iceland, and an attractive option for cross-Atlantic flights. Icelandair provides safe, reliable flights and exceptional service on flights to metropolitan areas on both sides of the Atlantic.

Icelandair provides FAA and EASA certification services as well as technical services to a number of airlines.

The airline operates out of Iceland, and uses the country's geographical location mid-way between America and Europe, as an opportunity to build an ever-growing network of international routes with Iceland as a hub.

Icelandair is a part of Icelandair Group. For more information about Icelandair, visit www.icelandair.com
